

I travel for a living all over The United States. I travel by van. XM provides me with all of the information that I need to keep me safe on the road. If it wasn't for XM I would have to use a cell phone service. You can't count on FM for anything. I do not want to have to wait for a half hour to hear five minutes of traffic and less of weather. Please let XM grow. The services they provide keeps getting better, and better. I pay for the services, why limit them?
